Seed Flow Meter

Flow Meter Test Equipment

New innovative seed flow meter for testing flowability of treated and or coated seed.

Applications

- Seed treatment
- Film Coating
- Build-up coating
- Pelleting
- Target
- Production sites
- R&D labs
- Formulation testing

Advantages

- Consistent & reliable flow measurement
- Adjustable stand for capture of seed
- Loading of seed at a comfortable height
- Simple to operate
- Easy to clean

Product Description

- New innovative seed flow meter for testing flowability of treated and or coated seed.
- Large to small capacity (5kg – 45kg seed, depending upon seed density)
- Test seed flow in two ways
- Set open / close time of seed gate, for multiple openings to measure flow over time
- Timer mode, Continuous flow of seed until sensor detects no more seed
- Record and export data
- Available 110v / 220v 50/60 hz

Standard Equipment

- AI Seed Flow Meter
- Electrical control box using PLC technology
- All safety related protection
